Professional Summary

Senior Flutter Developer with 7+ years of mobile application development experience building and maintaining production applications for Android and iOS. Strong expertise in Flutter, Dart, mobile architecture, Provider, BLoC/Cubit, REST APIs, WebSockets, authentication, and third-party integrations. Experienced in asynchronous programming, application lifecycle management, secure networking, performance and memory optimization, automated testing, CI/CD, and app-store releases. Proven ownership of mobile development from architecture and implementation through production deployment.

Technical Skills

Languages: Dart, JavaScript
Flutter & Mobile: Flutter SDK, Android, iOS, Responsive UI, Application Lifecycle, Futures, Streams, async/await, Asynchronous Programming
Architecture & State Management: Mobile Architecture, Design Patterns, SOLID Principles, Clean Architecture, Dependency Injection (DI), Reusable Components, Provider, BLoC, Cubit
Networking & Backend: REST APIs, WebSockets, Dio, Firebase, MongoDB
Authentication & Security: OAuth/SSO, JWT, Token Refresh, Secure Storage, Biometric Authentication, Trusted-Device Authentication
Integrations: Stripe, OneSignal, Push Notifications, Deep Linking, Google Maps, Descope OAuth
Testing & Performance: Unit Testing, Widget Testing, Integration Testing, Debugging, Memory and Performance Optimization
CI/CD & Tools: Fastlane, Bitbucket Pipelines, Git, GitHub, Postman, JIRA, Cloudinary

Professional Experience

Apptware Solutions LLP **January 2021 – Present**
Senior Mobile Developer | Pune, Maharashtra

- Engineer and maintain production-grade Flutter applications for Android and iOS, contributing across architecture, feature development, testing, debugging, and release management.
- Design reusable UI components and maintainable application structures; apply state management using Provider and BLoC/Cubit according to project requirements.
- Integrate REST APIs, WebSockets, payment gateways, authentication services, push notifications, deep links, and third-party SDKs.
- Secure networking and authentication flows through JWT refresh interceptors, secure token storage, biometric authentication, and request retry handling.
- Optimize application reliability, performance, and memory usage through debugging, code optimization, and automated testing.
- Coordinate Android and iOS build and release workflows using Fastlane and Bitbucket Pipelines; contribute to code reviews, technical discussions, and production issue resolution.

Aceventura Services **December 2018 – November 2020**
Android / Flutter Developer | Pune, Maharashtra

- Delivered Android and Flutter applications with responsive interfaces, REST API integrations, and platform-specific functionality.
- Diagnosed application issues, optimized performance, and maintained existing codebases in collaboration with the development team.

Freelance **October 2017 – February 2018**
Android Developer | Pune, Maharashtra

- Built Android application features, integrated backend APIs, and resolved defects based on client requirements.

Key Projects

PCLive247 – Real-Time Memorabilia & Sports Card Auction Marketplace
Tech: Flutter, Dart, Provider, WebSockets, REST APIs, Stripe, OneSignal, Secure Storage, Fastlane

- Built and maintained a production cross-platform marketplace featuring live auction rooms and scheduled sports-card uploads.
- Engineered real-time auction functionality using WebSockets, including quick bidding, countdown timers, participant tracking, in-room messaging, and audio feedback.
- Integrated Stripe payments, Apple Sign-In, Google Sign-In, and OneSignal notifications with deep links for auction

alerts and shipment tracking.
- Strengthened application security and networking reliability through biometric app locking, secure token storage, JWT refresh interceptors, and request retry handling.

SmartMariner – Marine Services & Boat Management Ecosystem

Tech: Flutter, Dart, BLoC/Cubit, Dio, Hive, Descope OAuth, Google Maps, CI/CD

- Owned end-to-end mobile development as the sole mobile engineer, from greenfield architecture and implementation through Android and iOS production releases.
- Built multi-persona workflows for boat owners, marine service providers, and dealers, including multi-step listings and map-based discovery.
- Established Hive-based draft persistence, provider analytics, and authentication/networking flows using Dio interceptors, token refresh, Descope OAuth/SSO, and trusted-device authentication.
- Coordinated environment-specific builds and releases across development, QA, and production, including in-app update gating and native platform configuration.

Education

Bachelor's Degree in Computer Science **2013 – 2017**

All India Shri Shivaji Memorial Society's College of Engineering, Pune

Certifications

Building with the Claude API – Anthropic, 2027 Credential

Claude Code in Action – Anthropic, 2027 Credential

Introduction to Model Context Protocol (MCP) – Anthropic, 2027 Credential

Introduction to Agent Skills – Anthropic, 2027 Credential
